

Superabsorbers Industry solutions

Your partner Bückmann

Bückmann is an owner-managed company in the field of screening and separation technology.

For over 20 years, we have processed superabsorbers (SAP) for various customers at home and abroad within our business field of processing service. Construction of a new production hall for SAP products, among others, now allows us to assist you still more quickly and flexibly.

Processing service

Contracting out jobs is a matter of trust. That is why we offer you as much transparency as possible: customer audits, customer visits or the acceptance of customer specifications. Naturally, we are certified according to DIN EN ISO 9001 and take it very seriously.

Bückmann can rightfully call itself a specialist in the processing of SAP products today. The current system technology has been configured specially for the target group of SAP products.

Options for material preparation at Bückmann:

- | | |
|----------------------|--|
| Grinding: | Various grinding systems for comminution to many grain size ranges without being hard on the product |
| Screening: | Screening machines for various throughput volumes and sizes |
| Homogenizing/mixing: | Conical screw mixer, biconical mixer |
| Bagging process: | Big Bags, sacks, barrels, drums via filling systems |

Production Area (Technicum)

We can offer a large, modern and well equipped production-area and are able to perform many process-steps and to fulfill SAP-orders from experimental- and trial-scale to a production scale. It enables the customer and us a maximum of safety and guarantees a comprehensible process.
